## San Diego Hotel Goes Electric

Want to try a fun and environmentally friendly alternative to traditional ground transportation for off-site events? The Four-Diamond **Paradise Point Resort & Spa** in San Diego is offering electric cars for one-way or round-trip rentals and six charging stations as an eco-friendly and cost-conscious mode of transportation for meeting attendees.

The cars can travel up to 84 miles on a single charge and can be dropped anywhere within a 27-mile service area. To sweeten the deal, insurance, recharging, cleaning, GPS navigation and metered parking are all included in the rental fee. [paradisepoint.com](http://paradisepoint.com)

Gotta Have It

## Recharge on the Go

Tech-dependent, on-the-go meeting planners (which is to say, all meeting planners) should appreciate the newly launched **Powerbag**, a travel bag equipped with a complete charging system that can power up to four devices

at a time. Need to juice your smart phone, iPad or eReader?

They're covered—as are hundreds of other products. A snappy design and three styles to choose from—

backpack, messenger bag or briefcase—complement the practicality with style.
